EXPERIENCE

PAYTM | SOFTWARE ENGINEER (PAYMENT GATEWAY)

📅 Jan 2022 – Present

- Integrated several banks and aggregators with PG, which are providing their services with an accuracy of around 80%.
- Helped in increasing the success rates of several banks that had a success rate of less than 15%.
- Tech Stack - Java, Spring Boot and Kibana.

MICROSOFT | MICROSOFT ENGAGE MENTEE [Project](#)

📅 Nov 2021 – Dec 2021

- As an engage mentee, I designed and built a web application that connects instructors and student.
- It enables them to interact and continue their academic work from the comfort of their own homes.
- Even though it is using free servers, it can handle 2000 requests per hour.
- Tech Stack - HTML, CSS, React, Redux, Node.js, Express and MongoDB.

PROJECTS

DEVELOPERS WEB [Website](#) [Github](#)

📅 Apr 2021

- A social networking service for the global developer community.
- To complete the duties, I used a combination of third-party and REST APIs, as well as a redux architecture for global state management.
- It has the basic features of a social media site and can handle approximately 100 requests per minute.
- Tech Stack - React, Nodejs, Express and MongoDB.

FOOD BONANZA [Website](#) [Github](#)

📅 Jan 2021

- A web application with a responsive front-end satisfies all of a restaurant's fundamental requirements.
- This project was designed and developed using agile methodology, and it can easily sustain with incremental changes.
- Tech Stack - HTML, CSS3, React and Redux.

CORONA TRACKER [Website](#) [Github](#)

📅 Jun 2020

- Corona virus information is provided in text and graphical format in real time.
- Provide information about 29 Indian states and over 100 countries.
- Axios is used to collect data from various end points, and several third-party packages are also used to improve the user interface.
- Tech Stack - HTML, CSS3, Bootstrap, React and Redux.
